

DIRECTIONS FOR USE:

Mixing: Half fill tank with water. Add the required amount of AfriKelp Plus. Add wetting agent as recommended by manufacturer. Fill the remainder of tank with water, maintain agitation.

Storage: Store in a cool, dry area. Protect from heat and cold extremes.

CROP	SOIL APPLICATION	NOTES (SOIL)	FOLIAR APPLICATIONS	GROWTH STAGE	NOTES (FOLIAR)
Tobacco	10l per ha @ 2.5% dilution	At base of plant 2 weeks after planting or with first Nitrogen application	2-4L per ha @ 2-3% dilution	At 2 and 4 weeks after planting	Avoid hot, windy weather
Tobacco & Other Seedlings	2ml per square meter at planting and at replanting	Drench with a 2.5% dilution (250ml in a 10L watering can)	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At germination and 2 and 4 weeks after planting	Avoid hot, windy weather
Soya & Other Legumes	10l per ha	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At the 3 leaf stage	Avoid hot, windy weather
Maize & Wheat	10l per ha	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At the 3 - 5 leaves	Avoid hot, windy weather
Potatoes	10l to 20l per ha (use 20l under high pH conditions)	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At germination and 2 and 4 weeks later	Avoid hot, windy weather
Macadamias & Avos	10l per ha twice in the season with Nitrogen application or with the flush	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	During the flush	Avoid hot, windy weather
Deciduous Fruits & Nuts	10l per ha twice in the season with Nitrogen application or with the flush	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	During the flush	Avoid hot, windy weather
Tomatoes & Vegetables	10l to 20l per ha (use 20l under high pH conditions)	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At 2 and 4 weeks after planting	Avoid hot, windy weather

Use when recommended. Apply recommended rates, do not exceed use.
