

# DIRECTIONS SHEET

## How to use:

CROP	SOIL APPLICATION	NOTES	FOLIAR	GROWTH STAGE	NOTES
<b>Tobacco</b>	10l per ha @ 2.5% dilution	At base of plant 2 weeks after planting or with first Nitrogen application	2-4L per ha @ 2-3% dilution	At 2 and 4 weeks after planting	Avoid hot, windy weather
<b>Tobacco &amp; Other Seedlings</b>	2ml per square meter at planting and at replanting	Drench with a 2.5% dilution (250ml in a 10L watering can)	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At germination and 2 and 4 weeks after planting	Avoid hot, windy weather
<b>Soya &amp; Other Legumes</b>	10l per ha	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At the 3 leaf stage	Avoid hot, windy weather
<b>Maize &amp; Wheat</b>	10l per ha	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At the 3 - 5 leaves	Avoid hot, windy weather
<b>Potatoes</b>	10l to 20l per ha (use 20l under high pH conditions)	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At germination and 2 and 4 weeks later	Avoid hot, windy weather
<b>Macadamias &amp; Avos</b>	10l per ha twice in the season with Nitrogen application or with the flush	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	During the flush	Avoid hot, windy weather
<b>Deciduous Fruits</b>	10l per ha twice in the season with Nitrogen application or with the flush	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	During the flush	Avoid hot, windy weather
<b>Tomatoes &amp; Vegetables</b>	10l to 20l per ha (use 20l under high pH conditions)	Via irrigation or spray rig or dribble on the row	2-4L per ha @ 2.5% dilution (250ml in a 10L watering can)	At 2 and 4 weeks after planting	Avoid hot, windy weather

### PRECAUTIONS:

The spray from this product may act as an irritant. Users are encouraged to seek further advice. Wear appropriate protective clothing.

### DIRECTIONS FOR USE:

Use when recommended. Apply recommended rates, do not exceed use. Seek further advice.

### MIXING INSTRUCTIONS:

Half fill tank with water. Add the required amount of AfriKelp Plus. Add wetting agent as recommended by manufacturer. Fill the remainder of tank with water, maintain agitation.

### COMPATIBILITY:

Follow all labels carefully. This product may be compatible with other agrochemicals. Seek advice before mixing.

### STORAGE:

Store in a cool, dry area. Protect from heat and cold extremes. Keep out of reach of children and animals.
